

The Jet-Tech T-Spy is a small, compact, easy to use, non-contact infrared thermometer with a temperature range of -33°C to +220°C at a resolution of 0.1°C.

Simply aim the thermometer at the target and press the measurement button to display the surface temperature. It has maximum and minimum lock functions to help you note the temperature of your target.

It is ideal for taking the surface temperature of the track surface, engine, radiator, brakes, tyres etc.

So why have we called it the T-Spy? Well do you really think your tyre; brake, engine and other Key Performance Temperatures are safe any more! If in parc-ferme someone walks past your kart, are you sure that he hasn't got the T-Spy in the palm of his hand!!!

Specifications
